

MULTIPLE PICTURE ORDER FORM

Use a new form for separate tapes.

Please read the instructions overleaf before completing.

Samples of your photos will be emailed prior to printing.

Having a DVD made first makes identifying pictures easier!

TAPE FORMAT : (Please circle)

VHS - VHS-C - S-VHS

Mini DV - Hi8 (note 8mm not supported)

TAPE LABEL

(Label your tape with name & postcode)

Name	
Address	
Postcode	
Daytime Tel:	Evening Tel:
Mobile Tel:	
Email (essential)	

RESETS TO ZERO

Give details of the timecode prior to any resets to zero - see instructions overleaf.

0		1		2		3		4		5		6		7	
Hrs	Min	Hrs	Min	Hrs	Min	Hrs	Min	Hrs	Min	Hrs	Min	Hrs	Min	Hrs	Min
00h	00m														

Zero Reset No.	TIMECODE				PICTURE DESCRIPTION	Option A,B,C.	Quantity	PRICE & Postage (inc. VAT)	TOTAL (inc. VAT)
	Hrs	Min	Sec	Frame					
	00h	00m	00s	00f			1	£21.85	£21.85
								£6.90	
								£6.90	
								£6.90	
								£6.90	
SPECIAL OFFER! Order a DVD of your Video at the same time as your pictures and get it for only £7.00 ex VAT (1 hour tapes only).							1	£8.05	
If you want copies of the same picture using more than one Option (A,B,C) simply write "ditto" on the next row down and then enter Option A, B or C and the quantity required. The minimum order is £21.85 incl P&P & VAT								TOTAL (inc VAT)	

If you need more pictures than there is space for here please print another sheet to complete you order.

Please sign the declaration and enclose with tape/dvd, a cheque payable to DIGIMAC - then send to 102 Priory Road, Southampton SO17 2HS.

Declaration: I have read and agree to the terms and conditions (see website).

MULTIPLE PICTURE INSTRUCTIONS

We will email to you samples of the pictures for confirmation prior to printing.

ZERO RESETS

It is often the case that the timecode on a tape will have reset itself if you have filmed something then played it back and then carried on filming (possibly on a different day).

If so, the timecode will run from 00h 00m 00s 00f (zero) to where you stopped filming and then reset itself to zero again (00h 00m 00s 00f).

So in theory there could be 2 or more points on the tape which read identically in terms of timecode. So, we need to know how many times the counter has reset itself in order to find the right frame.

There is an easy way to check if this has happened. In the case of a standard 60 min tape all you do is put it in the camcorder or player and fully rewind it. Then fast forward it, all the while keeping an eye on the minute reading of the timecode, e.g. 00h **25m** 34s 12f . If the minutes continue to add up sequentially 1,2,3,4,5,6... (without resetting to zero) identifying your frames will be easy. If, however, the timecode resets to zero at any point, just make a note of the minute reading it got to prior to the reset, then continue fast forwarding to the end of the tape making note of any further resets to zero. Then detail this information on the order form and proceed as follows below.

Mini DV & Hi8 Tape instructions

Step 1 - Fully rewind the tape.

Step 2 - Advance the tape to the first image and write down (on the order form) the timecode and the number of resets to zero prior to your picture.

Repeat this for subsequent images.

Step 3 - Rewind the tape again and post it to us with the hours, mins, secs, and most importantly the frame of each picture you require printing.

Remember -Make a note of the exact frame you require printing. eg. 00h 23m 15s **10f**.

VHS Tape

Note this method will only work if your VHS deck gives a read out in hours mins and secs, which most do nowadays (there may not be a frame reading).

Step 1 - Fully rewind the tape.

Step 2 - Reset the counter to zero - if in doubt eject the tape and reinsert it which should zero the clock.

Step 3 - Advance the tape to the first image and write down (on the order form) the timecode and the number of resets to zero prior to your picture.

Repeat this for subsequent images.

Step 4 - Rewind the tape again and post it to us with the completed order form showing the hours, mins and secs of each picture you require printing.

Attaining frame accuracy with VHS is nearly impossible with standard equipment so a description of each picture will make things more accurate. Remember we will email you samples of the images we have identified using your instructions for confirmation prior to printing. See terms and conditions on web site.

**POST your Tape, Order form and Cheque (made payable to Digimac) to:
Photos from Video, 102 Priory Road, Southampton, SO17 2HS.**
